Press Release:

Due to the continued lack of rain and drought conditions, The City of Stanley is reaching out to local residents and businesses requesting that you try to conserve as much water as possible. Any watering of lawns, washing of vehicles, filling or topping off of pools should be kept at a minimum due to current conditions.

This request is in direct response to the drought conditions that have been ongoing as well as the lack of rain the City has received. The City needs to conserve water in order to maintain an adequate supply for drinking as well as fire protection for the residents and businesses.

Any and all help provided by the residents, businesses and schools would be greatly appreciated.

Thank you,
City of Stanley Water Department
